Paging Management System Installation Guide

---Only applicable for CooVox-U60/U100

PMS(Paging Management System), which is used to manage iSpeaker can be installed on x86 platform(CooVox-U60/U100) to collaborate with CooVox IP PBX system.

1. Prepare

- Please ensure the network is working stably before installation.
- To avoid any problem, please upgrade your IP PBX system to V1.1.1 (The patch can be downloaded from Zycoo website).

2. Get Script for One-click Installation

Please contact Zycoo sales manager to get the script (pms_install.sh) for one-click installation.

3. Run Installation Script

- Copy script “pms_install.sh” to CooVox-U60 or U100;
- Execute command “chmod +x pms_install.sh” to add the executable permission for script;
- Run “./pms_install U100” or “./pms_install U60” from the background of your IP PBX;
- This script will help you download PMS package from Zycoo server automatically, install PMS and initial configure;
- After installation, IP PBX system will be reboot automatically.

If there is error in installation and you need install again with the script, please uninstall some software according to reminding before reinstall.

4. Login PMS

After installation PMS, please visit the PMS GUI by inputting the IP with PMS port number in your browser.

E.g.: PBX IP address: 192.168.1.96, then PMS IP address is <http://192.168.1.96:9997>.

Default user name and password: admin/ admin.
